I enjoyed meeting with you both. I ended up working on arrangements regarding a sinking vessel in Tacoma on Monday so I didn't end up having time to come by your facility up there.

Regarding the pontoons, thanks for taking a look at it. We are working on the legal end here to get permission to move them. I checked with Metals Express, the company with the state contract for metal scrap. They are willing to accept them at Schnitzer Steel's dock in Tacoma—we just have to time it when Schnitzer doesn't have a scrap barge at their dock.

Once I have permission to go ahead I'll let you know and we can get those things welded and out of there!
Thanks,

Melissa Ferris

Ms. Ferris,

It was a pleasure meeting with you last week. I hope that you are settling into your new offices okay.

DNR-00048212

I took the liberty of looking up the "floatation tanks" that we talked about near Bremerton on Google Earth. They look to be about 10' in diameter and 40' long. We can go look at the tanks and figure out what is needed for patching and the like. Also, I talked with one of our sister units about using one of their small tugs to tow the tanks to the scrapyard - they are interested in helping out too.

Looking forward to working with you,

Randy Ichiyama
